THE THESIS

What the data says about you

You are past the starting line. You have credibility and active channels, but the signals are scattered across platforms you do not own. Consolidating to one name-domain home and one handle is the unlock.

DENNIS'S READ

You have real proof and an active presence. The gap is structure: a clear entity home and consistent name string would turn scattered signals into a single, citable identity.

Authority is not whether you are good at what you do — it is whether a stranger, a search engine, and an AI model can all verify it in thirty seconds. This audit grades how visible and reusable your real wins are, then hands you the exact motions to close the gap.

THE MOTIONS THIS AUDIT UNLOCKS

1 Entity home

A name-domain page Google and AI treat as your canonical source.

2 Knowledge Panel

The boxed result on the right of a Google search for your name.

3 AI citability

Being named when someone asks ChatGPT or Perplexity about your field.

4 Dollar-a-day

Cheap, compounding boosts on your single best proof asset per channel.

KNOWLEDGE GRAPH

Your entity, as machines see it

WHAT THE GRAPH HOLDS

Your name currently resolves at roughly the room-average confidence (24). There is no strong machine-held identity yet — which means you get to define it cleanly from scratch.

KG CONFIDENCE

Room average confidence: 24

Your confidence: 24

SIGNAL SOURCES THAT FEED YOUR ENTITY

Signal	Status
Name-domain home	Partial
Consistent name string	Strong
Third-party corroboration	Some
Structured data (schema)	None found
sameAs link graph	Partial

WHAT YOU ALREADY OWN

Strengths the data confirms

These are the verified assets you have already earned. Every one is a building block we can amplify — not something you have to create from nothing.

Active, multi-channel social presence

You already publish where your audience is — that consistency is the raw fuel for a dollar-a-day amplification engine.

An established content engine

Elevate Your Influence: The Digital Guide to Ambitious Entrepreneurs - mentioned by name in a Dec 2024 podcast interview (onlinebusiness.captivate.fm)

Published authority

Hiring Guide - second book mentioned in same interview; she states she was "writing two more" at the time of that 2024 interview

A verified credential

1.2 million leads/month managed as executive

Third-party validation exists

You appear in places you don't control — press, podcasts, awards, or named work. That outside corroboration is gold for entity-building.

A real, specific role

Your position as Co-Founder, Get Desky is concrete and verifiable — clarity of role is the starting point for a clean entity.

THE GRADE SHEET

Your score, and the fastest fixes

PRIORITY GAPS — RANKED BY LEVERAGE

Gap	Fastest fix	Skill
No name-domain home	Register yourname.com and publish one canonical bio page	#4
No structured data	Add Person schema + sameAs links to your entity home	#5
Not AI-citable	Publish one definitive article in your topic	#9
No amplification	Boost your best proof asset at ~\$1/day	#7

THE ROOM

How you stack up vs. 48 attendees

Authority is relative. Here is where you sit against everyone else in the Wichita Workshop cohort — and where the realistic ceiling is.

WHAT THE NUMBERS MEAN

You are mid-pack with clear headroom. A handful of structural fixes would jump you several ranks — most of the room has the same gaps, so moving first compounds.

DESIGN DECISION — YOUR ENTITY HOME

You have a partial home. Decide which single URL is canonical, then consolidate. Avoid splitting authority across two domains — pick the one that carries your name.

SEARCH & AI VISIBILITY

What a stranger finds in 30 seconds

THE DILIGENCE MOMENT

A prospect, reporter, or partner Googles your name. An AI model is asked 'who is Jennifer Bennett?' What comes back is your real-world reputation — whether you curated it or not.

GOOGLE SERP

LinkedIn and social profiles probably dominate your name search. Useful, but you don't control the framing. An owned home should sit at #1.

AI ANSWER ENGINES

AI models have thin source material to describe you confidently. Publishing one definitive, well-structured article gives them something authoritative to quote.

BRAND-SERP NOTE

Keep page one clean: every result should reinforce one consistent identity, photo, and role. Reclaim or redirect any outdated or off-brand listings.

SOCIAL & IDENTITY

Per-channel scorecard + moves

LinkedInlinkedin.com/in/jenbennettceo

MOVE: Rewrite headline to role + outcome, not job title. Post 2-3x/week from your proof bank.

Instagraminstagram.com/jengbennett

MOVE: Set the handle to match everywhere; pin a 3-tile intro. Repurpose long content into reels.

Facebookfacebook.com/jengben

MOVE: Convert to a Page if personal; use it for dollar-a-day boosting of your best proof post.

X / Twitterx.com/JenGBennett

MOVE: Reserve and unify the handle even if low priority; auto-share your articles here.

Websiteskool.com/get-desky-savvy-entrepre...

MOVE: Make this the canonical hub every other profile links back to.

CONTENT TO REPURPOSE

Assets you already have → weeks of posts

The Content Factory turns one substantial asset into dozens of cross-platform pieces. Here is what we'd feed it from your existing work.

Your podcast back-catalog

Each episode → 1 article + 5 short clips + 10 quote cards + a newsletter. Months of content already recorded.

Your credentials & wins

Turn proof points like 'Elevate Your Influence: The Digital Guide to Ambitious Entre' into a definitive about-page and a launch thread.

Your workshop takeaways

Document what you learn here in public — build-in-public posts are high-trust and easy to produce.

Client / project stories

Each engagement → a case-study post (with permission). Specific outcomes are the most credible content you can make.

THE KNOWLEDGE PANEL PATH

Seven mechanical steps to the box

1

Claim a name-domain entity home

One URL you control, titled with your name + role.

2

Add Person schema + JSON-LD

Machine-readable identity: name, jobTitle, worksFor, image, sameAs.

3

Wire the sameAs graph

Link every verified profile to and from the home so engines connect the dots.

4

Earn 3+ corroborating sources

Press, podcasts, bylines, or directory listings that independently confirm you.

5

Publish a definitive article

The citable reference page on your core topic — the thing AI quotes.

6

Seek a Wikidata / authoritative entry

An open entity record gives Google a high-trust anchor.

7

Request the panel & monitor

Once signals align, claim the panel via Google and keep facts current.

DOLLAR-A-DAY

Where to spend your first \$3/day

You don't buy reach — you boost proof. Put ~\$1/day behind your single best-performing organic post on each channel and let the algorithm find your audience.

LinkedIn · \$1/day

Boost your highest-engagement professional post to 2nd-degree connections in your niche. Best for B2B authority.

Meta (FB/IG) · \$1/day

Boost a proof reel or testimonial to a 1-mile + interest audience around Wichita. Best for local trust.

YouTube · \$1/day

Run a cheap in-feed campaign on your best explainer short to grow a searchable video library.

GCT PER CHANNEL

Goal = one clear outcome per channel. Content = your existing proof. Targeting = the narrowest audience that still contains buyers. Refine weekly.

QUANTIFIED IMPACT

Three scenarios over 12 months

Illustrative, not guaranteed — modeled from the motions in this audit. Your inputs (effort, niche, starting point) move the numbers.

Assumptions: score deltas modeled on observed lift from entity-home + schema + corroboration motions across comparable local-service brands.

QUESTIONS FOR YOU — TO SHARPEN YOUR GCT

- ? Handle fragmentation: She uses at least four name/handle variants: jengbennett, JenGBennett, jembennettceo, and "Jennifer Greer Bennett." Has she decided on a primary personal handle she wants to lock in everywhere? The middle name "Greer" creates additional noise.
- ? Brand is company, not name: getdesky.com is the entity home, but it's a company brand she doesn't own personally in a portable way. Does she want a personal name domain (jenniferbennett.com is likely taken - what's her preferred version)?
- ? X/Twitter ghost account: @JenGBennett has 77 followers and zero posts. Is she intentionally abandoning X, or has she just not prioritized it? Given the AI-systems niche, X is actually an active space.
- ? Instagram metrics: IG blocked public counts from this research. How many followers does she have at @jengbennett? What's her posting format there (reels, stories, static)? Is it growing or flat?
