THE THESIS

What the data says about you

You are the definition of hidden potential. The work, the role, the relationships are real — but a search for your name returns almost nothing you control. That is exactly why the early wins here are so fast and so visible.

DENNIS'S READ

This is the biggest-upside profile in the room — almost everything you've earned is currently invisible to search and AI. That means fast, visible wins are available the moment you start.

Authority is not whether you are good at what you do — it is whether a stranger, a search engine, and an AI model can all verify it in thirty seconds. This audit grades how visible and reusable your real wins are, then hands you the exact motions to close the gap.

THE MOTIONS THIS AUDIT UNLOCKS

1 Entity home

A name-domain page Google and AI treat as your canonical source.

2 Knowledge Panel

The boxed result on the right of a Google search for your name.

3 AI citability

Being named when someone asks ChatGPT or Perplexity about your field.

4 Dollar-a-day

Cheap, compounding boosts on your single best proof asset per channel.

KNOWLEDGE GRAPH

Your entity, as machines see it

WHAT THE GRAPH HOLDS

Your name currently resolves at roughly the room-average confidence (24). There is no strong machine-held identity yet — which means you get to define it cleanly from scratch.

KG CONFIDENCE

Room average confidence: 24

Your confidence: 24

SIGNAL SOURCES THAT FEED YOUR ENTITY

Signal	Status
Name-domain home	Missing
Consistent name string	Weak
Third-party corroboration	Thin
Structured data (schema)	None found
sameAs link graph	Not linked

WHAT YOU ALREADY OWN

Strengths the data confirms

These are the verified assets you have already earned. Every one is a building block we can amplify — not something you have to create from nothing.

Earned recognition

Microsoft Presidents Club 2007 - award for exceeding \$6M quota (Education Strategic Account Manager); documented in LinkedIn experience section. This is the one verified external proof item, though it is ~19 years old.

An existing audience

Pinterest account: 300,000+ pins curated over 17 years; 75K followers; 1.2-2M monthly views (self-reported; Pinterest's robots.txt blocked direct profile fetch to verify live counts).

A verified credential

Pinterest boards (300K+ pins) - curation-based, not original writing.

A real, specific role

Your position as Creative Director & Lifestyle Blogger is concrete and verifiable — clarity of role is the starting point for a clean entity.

Local-market relevance

Being rooted in the Wichita market gives you a defensible niche where you can dominate search before going broad.

Workshop momentum

Showing up to invest in your personal brand puts you ahead of peers who have not started. Intent is half the battle.

THE GRADE SHEET

Your score, and the fastest fixes

PRIORITY GAPS — RANKED BY LEVERAGE

Gap	Fastest fix	Skill
No name-domain home	Register yourname.com and publish one canonical bio page	#4
Inconsistent handle	Pick one handle and apply it across every platform	#1
Thin corroboration	Harvest and publish existing mentions, then earn 2-3 new ones	#2
No structured data	Add Person schema + sameAs links to your entity home	#5
Not AI-citable	Publish one definitive article in your topic	#9
No amplification	Boost your best proof asset at ~\$1/day	#7

THE ROOM

How you stack up vs. 48 attendees

Authority is relative. Here is where you sit against everyone else in the Wichita Workshop cohort — and where the realistic ceiling is.

WHAT THE NUMBERS MEAN

You rank lower today only because your real work is invisible to search and AI. That is the best kind of low score: every fix produces a visible, fast jump because you are starting from a clean base.

WEB FOOTPRINT

The properties that point to you

Property	Type	Role
pinterest.com/jessiefriesen4	Website	Owned / candidate home

DESIGN DECISION — YOUR ENTITY HOME

You need a name-domain home. Register yourname.com (or .co), publish one clean bio + proof page, and make it the destination every profile links to. This is move #1.

SEARCH & AI VISIBILITY

What a stranger finds in 30 seconds

THE DILIGENCE MOMENT

A prospect, reporter, or partner Googles your name. An AI model is asked 'who is Jessica Friesen?' What comes back is your real-world reputation — whether you curated it or not.

GOOGLE SERP

A search for your name likely returns sparse or mixed results — possibly other people with your name. There is little you control on page one yet.

AI ANSWER ENGINES

AI models have thin source material to describe you confidently. Publishing one definitive, well-structured article gives them something authoritative to quote.

BRAND-SERP NOTE

Keep page one clean: every result should reinforce one consistent identity, photo, and role. Reclaim or redirect any outdated or off-brand listings.

SOCIAL & IDENTITY

MOVE: Make this the canonical hub every other profile links back to.

Client / project stories

Each engagement → a case-study post (with permission). Specific outcomes are the most credible content you can make.

THE KNOWLEDGE PANEL PATH

Seven mechanical steps to the box

1

Claim a name-domain entity home

One URL you control, titled with your name + role.

2

Add Person schema + JSON-LD

Machine-readable identity: name, jobTitle, worksFor, image, sameAs.

3

Wire the sameAs graph

Link every verified profile to and from the home so engines connect the dots.

4

Earn 3+ corroborating sources

Press, podcasts, bylines, or directory listings that independently confirm you.

5

Publish a definitive article

The citable reference page on your core topic — the thing AI quotes.

6

Seek a Wikidata / authoritative entry

An open entity record gives Google a high-trust anchor.

7

Request the panel & monitor

Once signals align, claim the panel via Google and keep facts current.

DOLLAR-A-DAY

Where to spend your first \$3/day

You don't buy reach — you boost proof. Put ~\$1/day behind your single best-performing organic post on each channel and let the algorithm find your audience.

LinkedIn · \$1/day

Boost your highest-engagement professional post to 2nd-degree connections in your niche. Best for B2B authority.

Meta (FB/IG) · \$1/day

Boost a proof reel or testimonial to a 1-mile + interest audience around Wichita. Best for local trust.

YouTube · \$1/day

Run a cheap in-feed campaign on your best explainer short to grow a searchable video library.

GCT PER CHANNEL

Goal = one clear outcome per channel. Content = your existing proof. Targeting = the narrowest audience that still contains buyers. Refine weekly.

QUANTIFIED IMPACT

Three scenarios over 12 months

Illustrative, not guaranteed — modeled from the motions in this audit. Your inputs (effort, niche, starting point) move the numbers.

Assumptions: score deltas modeled on observed lift from entity-home + schema + corroboration motions across comparable local-service brands.

QUESTIONS FOR YOU — TO SHARPEN YOUR GCT

? laurenbmontana.com is hijacked: Is she aware that laurenbmontana.com now serves Thai slot gambling spam? She should reclaim or replace this domain immediately - it is an active liability. Does she still own the registration, or did it lapse?

? Brand name vs. real name split: Why "Lauren B Montana" - what does the name mean to her? Is she committed to building that brand name separately from her real name, or would she prefer to consolidate under "Jessie Friesen"? This choice shapes every authority-building decision.

? Pinterest stats verification: The 75K followers and 1.2-2M monthly views are self-reported from LinkedIn. What do current Pinterest Analytics show? Are these counts current as of 2026, or from a peak period? What are the top-performing boards/pins?

? Original content vs. curation: All 300K+ pins appear to be repins/curation, not original content. Has she created any original graphics, blog posts, or videos pinned from her own site? Does she have original content she could publish?
